

# Clock system for Education

## Broomfield House School

### Overview

The school has several buildings located in the London area.

### Customers requirements

The school required a synchronised bell and clock system to reduce confusion and inefficiency by providing accurate time for school breaks and start/end of lessons.

### Bodet recommendation

As the school has a mix of old and new buildings, we have recommended our wireless solution to avoid cabling between the premises. Bells and clocks are controlled and synchronised wirelessly by a master clock unit.

### Benefits:

- Bell and clocks synchronised
- Automatic winter/summer changeover and 100% accurate
- Reduce confusion and inefficiency by synchronising time throughout all floors

### Material

- [Analogue clocks](#) Profil 930 Indoor & Profil 940 Outdoor (playground)
- Wireless Bell (classrooms and Offices)

## Sandringham Primary School

### Overview

The school based in London was looking for accurate clocks to display the same time in each rooms of the building.

### Bodet Recommendation

We have recommended our radio clocks as we could get the [MSF signal](#) inside the building.

### Benefits:

- Automatic winter/summer changeover
- 100% accurate
- Reduce confusion and inefficiency by synchronising time throughout all floors

### Material

- Analogue clock [Profil 960 Outdoor](#) (playground)
- LCD Digital clock [Cristalys Date](#) (classrooms and offices)
