Bodet launch Kelio V10.2

Manage Staff Attendance & Absenteeism – while on the move

- **NEW Extension up to 10,000 Employees**
- **NEW Clocking Mobile**
- **NEW Touch Screen Application**
- **NEW Time & Attendance Mobile**
- **NEW Fire alarm Reporting Intranet Mobile**
- **NEW Visitors Access Control Systems**
- **NEW Clocking Terminals and Access Control Readers**

Kelio Extension of Employee capacity – 10,000

Kelio V10.2 Time & Attendance software is certified to monitor up to 10,000 employees based at either a single or multiple sites. The solution is capable of supporting employees working time, absences and is ideal for staff scheduling for between 10 to 10,000 employees.

Kelio Clocking mobile – iPad and other Smart Phones

The Kelio V10.2 Time & Attendance Mobile solution allows managers and staff to clock-in while on the move. Employees can clock in through their smart phone in addition to proximity and biometric clocking terminals.

Kelio intranet mobile is certified on Android® v2.3 Gingerbread, BlackBerry® OS 5 and Apple® iOS4. With a geolocation link, managers are able to know exactly when and where an employee has clocked in. Kelio always supports proximity HID, STID and Mifare cards, Fingerprint and hand scan biometric recognition and self-service.

Kelio Touch screen application – Kiosk

The Kelio Touch Screen Application works as an intranet computer that allows self-service and virtual clocking, activity job costing, attendance board display and absence request management.

The Kiosk is used as an intranet computer shared by all employees working at the same site without their own computer.

Kelio Time and Attendance mobile – iPad and other tablets

The Kelio V10.2 Time & Attendance Mobile solution allows managers and staff to look at clocking-in and attendance monitoring on the move. With the Kelio mobile solution, managers are also able to manage attendance and absences of employees on a tablet computer in real time regardless of location.

Kelio intranet mobile is certified on Android®, BlackBerry, Microsoft and Apple® iOS4.

Kelio Fire alarm reporting intranet mobile – iPad printer

The Fire Safety Evacuation Procedures outlines the actions to be taken on discovering a fire or hearing a fire alarm and explains the duties of Fire Marshals and the Person in Charge.

One of these duties is to print the Fire Alarm Report of employees present. This report can be suitably customised from within the Kelio software.

Furthermore, you are now able to display this report on the move. A tablet computer is only required to display the fire alarm report that is accurate at anytime and everywhere.

Kelio Visitors – Integrated visitor management module

Kelio is now available to monitor and control access for temporary cardholder - visitors - in your premises. This module provides a user-friendly and powerful tool to record a visitor including personal details, reason for visit and scheduled time of appointment along with the name of the employee responsible for the visitor.

The application also allows useful features to track visitors each time they spend throughout your facilities in real time. Once a visit has been completed, a visit report is printed to be signed by visitor and sponsor. Visitor cards can be easily reused either for the same visitor at a later time or for a different visitor with new set of privileges.

Kelio Clocking terminals and Kelio Access Control readers

Kelio Prio IP V2 terminal is a new design for a clocking terminal compatible with Kelio software V10.2 and IP network. These Prio IP V2 terminals support up to 2,000 employees with proximity cards as fingerprint recognition.

Kelio Access Control Unit

The new hardware, allows an organisation to expand the number of doors, barriers and other access units it can manage in real time.

Kelio Access Control Reader

The Kelio Access Control Reader is a new range of access readers available with a keypad and one of the following proximity identification, STID, HID and Mifare.

Marc Clavereau, UK Managing Director at Bodet says, "The launch of Kelio V10.2 offers a new way to manage staff attendance and absenteeism. New features include the ability to monitor and track individuals at multiple locations, mobile clocking-in and monitoring and improved visitor access control technology. The new functionality offers an exciting range of new features which we are confident our customers will be delighted with"
