

Kelio Touch Terminal

Easy access for your employees
to the Kelio Employee Self-Service
module

Using the Kelio Employee Self-Service module through the touch terminal allows you to decentralise some administrative tasks, share information and give your staff a sense of responsibility.

Absence requests

Declare job costing after the event

So that time spent per project, client or activity can be accurately monitored, your employees can divide their attendance time by activity either as a percentage hours or as a time period.

Submit absence requests

Your staff members can submit absence requests by PC to be approved by their manager, replacing paper forms.

Check your personal results

In order to reduce requests for information to your HR department, employees can check their individual accounts.

Bodet

Kelio TouchTerminal

Easy access for your employees
to the Kelio Employee Self-Service
module
